Notes:

As the standard and software revisions of the cameras are subject to change, it is not possible to rule out impairments of function.

Swarovski Optik accepts no liability or guarantee for compatibility with the products referred to above.

In case you use a camera not listed yet, please inform us about manufacturer, brand and type. (info@swarovskioptik.at,subject: Digiscoping)

In case you plan to purchase a digital camera for use with a telescope ("digiscoping"), which is not list yet, please test the camera with the scope and the adapter first! The camera needs to be connected to the DCB and must be able to prevent "vignetting" (black shadows at the edge of the image) by using the optical zoom (not the digital zoom!) of the camera.
